

DEI-H Resources

Our Graduate Medical Education (GME) Office is dedicated to the principles of diversity, equity, and inclusion (DEI). Moreover, GME at the Medical College of Georgia is committed to the recruitment and training of diverse individuals in order to meet the needs of our diverse patient population. We are also committed to the recruitment and retention of a diverse group of individuals involved in the training and support of our House Staff learners. This dedication and commitment are evidenced by the appointment and support for or DEI GMEC Subcommittee, active discussion of DEI topics at our Interdisciplinary Resident Core Curriculum Conferences, recruitment events for interested medical students with a focus on DEI, and monthly journal clubs focusing on DEI topics.
