

# Lung Isolation Training Study **Assessment Form**

Principal Investigator: Mary Arthur, MD

Study #871303

In this study, you will practice the technique at least 4-10 times. You can practice as often as you like over the four weeks of the study.

Trainee ID# \_\_\_\_\_

Date \_\_\_\_\_

Name of Assessor \_\_\_\_\_ or  Self

Number of one-lung isolation attempts today **under supervision**

- 1    2    3    4    5 or more

Number of one-lung isolation attempts today **performed solo**

- 1    2    3    4    5 or more

**PGY4s only:** Number of one-lung isolation attempts today **in the operating room**

- 1    2    3    4    5 or more

Check the box if the trainee was able to:

- Demonstrate how patient should be positioned
- Demonstrate how the bronchial blocker is checked and assembled before use
- Demonstrate proper use of bronchoscope
- Identify the carina
- Differentiate the left from right bronchus
- Verbalize unique features of bronchial anatomy
- Place the bronchial blocker
- Discuss how to manage hypoxemia on one lung ventilation
- Troubleshoot wrong placement of bronchial blocker
- Demonstrate how to resume two-lung ventilation

Please use the space below to provide the trainee with feedback
