

**I. Scheduling Appointments**

- a. Due to this unprecedented health crisis, Student Health Services is taking steps to safely serve our population. Therefore, all students requesting services at the Student Health Clinic are requested to *call first* and not simply walk-in. We want to help ensure your safety by seeing you when the waiting room has as few patients as possible and minimizing potential exposure to others while practicing social distancing.
- b. Routine services such as physical exams, pap tests, vaccines, routine office procedures, and routine blood tests are not scheduled until early April or until further notice.
- c. Psychiatrist visits continue using phone consultations by appointment only. Call 706-721-3448 to schedule an appointment.
- d. All Student Health Clinic providers, including the psychiatrist, can refill your prescriptions via phone, as needed. Call 706-721-3448.
